PROFESSIONAL SUMMARY

Results-oriented Business Analyst with ~4 years of experience in the Capital Markets and FinTech domain, working with a US-based investment management firm (Capital Group Companies). Skilled in requirements elicitation, stakeholder management, user story creation, and end-to-end SDLC participation in Agile/Scrum environments. Proficient in translating complex business needs into actionable functional specifications, supporting product ownership, and driving process improvements. Adept at bridging communication between business stakeholders and technical teams to deliver high-quality solutions aligned with regulatory and operational requirements.

CORE COMPETENCIES & SKILLS

BA Core Skills	Requirements Elicitation, Gap Analysis, BRD/FRD Writing, Process Mapping, User Story Creation, Acceptance Criteria Definition, UAT Support
Domain	Capital Markets, Trade Life Cycle, Asset Classes (Equities, Fixed Income, Derivatives), Asset Management
Agile / SDLC	Scrum, Sprint Planning, Backlog Grooming, Sprint Demos, Stakeholder Management, Product Owner Support
Tools	JIRA, Confluence, draw.io, Microsoft Office Suite (Word, Excel, PowerPoint, Visio), GitHub
Technical & Systems Understanding	React.js, SQL, REST APIs, HTML/CSS, Data Mapping, AWS, CI/CD Pipelines
Soft Skills	Client Communication, Cross-functional Collaboration, Problem Solving, Documentation, Presentation

PROFESSIONAL EXPERIENCE

Business Analyst | Infosys Ltd. (Client: Capital Group Companies, USA) *June 2022 – Present*

Capital Group is one of the largest investment management firms globally. Worked within the FSDCG unit supporting Capital Markets and SEMI initiatives for a US-based investment management client in an Agile delivery environment across 2-week sprint cycles.

Requirements Elicitation & Documentation

- Engaged directly with business stakeholders, product owners, and SMEs to elicit, analyze, and document functional and non-functional requirements for Capital Markets applications.
- Authored Business Requirements Documents (BRDs), Functional Specification Documents (FSDs), and detailed user stories with clear acceptance criteria in Confluence and JIRA.
- Conducted gap analysis between current-state processes and proposed solutions, identifying key business impacts and risk areas.
- Mapped and modeled business processes using draw.io, creating process flow diagrams, data flow diagrams, and user journey maps to support shared understanding across teams.

Agile Delivery & Product Support

- Partnered with the Product Owner in sprint ceremonies — including backlog grooming, sprint planning, sprint reviews, and retrospectives — ensuring stories were well-defined and prioritized.
- Maintained and refined the product backlog, translating business objectives into epics, features, and granular user stories ready for development consumption.
- Facilitated stakeholder walkthroughs and sprint demos, collecting structured feedback and updating requirement documentation accordingly.

- Tracked project progress using JIRA, flagged blockers, and coordinated resolution between business, development, and QA teams.

Stakeholder Management & Communication

- Served as a primary liaison between US-based client stakeholders and the offshore delivery team, managing requirement alignment across time zones.
- Received formal client appreciation for ownership and proactive communication in resolving ambiguities and delivering timely solutions.
- Prepared and presented BA artefacts including requirement traceability matrices, change request documentation, and impact assessment reports.

UAT & Quality Assurance Support

- Defined and reviewed test scenarios and acceptance criteria in collaboration with the QA team, ensuring complete coverage of business requirements.
- Coordinated and supported User Acceptance Testing (UAT) cycles, managing defect logs, facilitating stakeholder sign-off, and documenting test outcomes.
- Validated that delivered functionality met agreed business requirements and regulatory compliance standards within the Capital Markets context.

Domain & Technical Collaboration

- Applied working knowledge of the trade life cycle, asset classes (equities, fixed income, derivatives), and portfolio management workflows to produce domain-accurate requirement artefacts.
- Collaborated closely with developers to clarify acceptance criteria and evaluate technical feasibility, leveraging understanding of REST APIs, SQL data models, and CI/CD pipelines.
- Contributed to API requirement documentation, data mapping exercises, and integration specifications between upstream and downstream Capital Markets systems.

CERTIFICATIONS & ACHIEVEMENTS

- Insta Award — Infosys, awarded for exceptional contribution and client impact.
- Platinum Club Member — Infosys, recognized for top-tier performance across delivery metrics.
- Infosys certified Global Agile developer and Infosys certified Business Consultant.
- Infosys certified Capital markets, Equities, Fixed Income and Derivatives associate.
- Infosys certified in SQL for Business Analysts.
- Actively upskilling in: Power BI for data-driven requirements.
